DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-9 in the reply filed on Dec. 31,
 acknowledged.

Specification

2. The disclosure is objected to because of the following informalities: the format of the specification does not comply with current U.S. practice.

Appropriate correction is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a

Application/Control Number: 10/572,881 Page 3

Art Unit: 3677

nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1,

Line 5, it is not clear what "one bracket" is referred to and how it is related to the door bracket o and the pillar bracket.

Lines 8-9, it is not clear how and where "an engagement element" is being supported, to be rotatable with the other bracket.

Lines 12-13, it cannot be understood structurally how "two stop members" are linked to "a spring element" and the "hinge pin".

Lines 17-18, "two neighbouring or opposite stop members" is vague and indefinite since the claim does not clearly define as such.

In claim 2,

Line 3, "hinge pin (5)" should be "the hinge pin (5)". Reference numerals in claims cannot be relied upon to define the invention.

In claim 3, line 4, the claim does not clearly define "said first spring element".

In claim 4,

Line 5, it is not clear how "an inside surface" is defined over the "surface...facing the stop member carrier" as stated in claim 1.

Line 7, "marked" should have been "mark".

In claim 5,

Line 5, "said spring elements" is not in agreement with "a spring element" of claim 1. Claim 5 fails to further limit the subject matter of claim 1.

Note similar errors in claim 6, line 4.

In claim 7, line 3, "pine" should be "pin".

In claim 9, line 4, "preferably..." renders the claim indefinite since the resulting claim does not set forth the metes and bounds of the patent protection desired.

Claim Rejections - 35 USC § 102

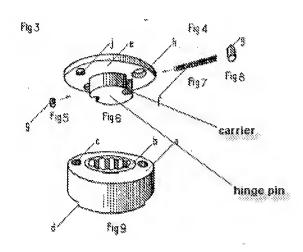

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3677

6. Claims 1, 2, 4-6 and 8, as best as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by FR 1,250,349. FR '349 shows brackets (d, e), a hinge pin and a carrier (see figure below), an engagement element with stop marks (b), spring (f) and stop member (g).

7. Claims 1-3 and 5-8, as best as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Bolinas et al. (5,765,263). '263 has brackets (26, 44), hinge pin (17), holder/stop carrier (18), stop members (42 of 19, fig. 4), additional spring element parallel to first element (figure 19), groove (104) for guiding stop member, bore (102) for guiding the spring, spiral spring (figure 21), protrusion (81), and hinge pin (17) "integrally formed" with stop member carrier (18).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/572,881 Page 6

Art Unit: 3677

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

9. Claims 3 and 9, as best as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over FR '349.

FR '349 discloses the invention as claimed but for the additional spring to bias the stop member. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use more than one spring to enhance the force for biasing the stop member, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co., 193 USPQ 8.*

As to claim 9, examiner takes Official Notice that surface hardening of the contacting surfaces in hinge parts is well known and common practice in the art. It would have been obvious to one skilled in the art to form the contacting surfaces with surface hardening process to withstand high stress and prevent wearing.

10. Claim 9, as best as understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Bolinas et al. '263.

As to claim 9, examiner takes Official Notice that surface hardening of the contacting surfaces in hinge parts is well known and common practice in the art. It would have been obvious to one skilled in the art to form the contacting surfaces with surface hardening process to withstand high stress and prevent wearing.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Mah whose telephone number is (571)272-7059. The examiner can normally be reached on 5/4-9.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Will can be reached on (571)272-6998. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Chuck Mah/ Primary Examiner, Art Unit 3677
